

Data Analyst (UK)

UK

Full Time

Department: Solutions

About Us

At CIPHER we are committed to extracting actionable intelligence from patent data, enabling companies and investors to make better and more informed commercial decisions. We recognize the importance of intellectual property as a growing mainstream asset class and the role of patents in providing a window into who is leading technology innovation, where and at what pace. By harnessing the latest advances in machine learning combined with expert analysis, CIPHER is disrupting how insight is extracted from patent data. Information can now be accessed with efficiency, accuracy and at a speed that is just not possible by traditional methods. We are looking for talented people to contribute to our mission.

Role Purpose

- Maintain and update corporate tree information ensuring best capture of organisations' parent and subsidiary structures.
- Extract actionable intelligence from classified patent data.

Entry level / early career development opportunity. No industry or patent experience necessary. Full training & support provided.

Responsibilities

The primary responsibility is to maintain and update CIPHER's corporate grouping information. This is done by accessing and interpreting publicly available information from various sources including press releases, financial reports and investor relations presentations. A secondary responsibility is to analyse pre-classified patent data and present it in a way that is easy to understand and to deliver actionable insight. This is achieved through a combination of existing templates and the creation of new data slices and visualisations that connect directly to client questions.

Success in this role requires close collaboration with account teams in understanding client questions and delivering high quality analysis to agreed timescales. The role requires desk-based research to gather data and information that feeds directly into internal and client-deliverables. There are opportunities and a requirement to work on a variety of data projects across the business and we want you to have fun and develop professionally while doing it.

The role is suited to results orientated individuals with an inquisitive mind who enjoy working with data, problem-solving and learning about new technologies and innovations. As we continue to grow there are plenty of opportunities for career development and advancement. This is limited only by an individual's capability and ambition.

The role requires strong analytical skills to slice, structure & present data so as it can be used as a key input to solve the challenges faced by the world's leading intellectual property teams.

Qualifications

- Advanced Excel skills
- An interest in innovation & new technologies
- Passionate about data-led storytelling.

Core Competencies

- Analytical
- Inquisitive
- Problem Solving
- Attention to detail
- Highly organised
- Results orientated
- Determined & resilient
- Self-starter / Motivated

Benefits:

We offer a competitive salary with bonus scheme. Benefits include 25 days holiday increasing to up to 27 with service, employee health insurance and pension plan. Flexible working model.

Our Values:

Start With Why: Seek to understand and empathise, the customer is our compass.

Insight Not Data: Slice through complex data to deliver actionable intelligence.

Be Brave: Challenge accepted practices, try new things, push ourselves and our clients.

Team Up: Reach out and rally round. We are one team with one mission. Collaborate at every turn.

Enjoy the Ride: We are on an adventure, buckle up, bring positive energy, and have fun.

We are an equal opportunities employer and are committed to supporting the professional development of each individual and helping everyone to reach their full potential.
